

**TRANSACTIONS OF THE INSTITUTE OF FLUID-FLOW MACHINERY**  
**No. 134, 2016**

**C O N T E N T S**

<b>W. Cholewa:</b> Ontology-driven diagnostic modeling fluid-flow machinery .....	3
<b>P. Bagiński and G. Żywica:</b> The influence of temperature on dynamics of the rotor foil bearing system temperature model .....	11
<b>J. Chmielecki, G. Liśkiewicz and W. Kryłłowicz:</b> Numerical study of surge predecessors in centrifugal blower inlet recirculation .....	29
<b>M. Hoznedl, L. Bednář and L. Tajč:</b> Changes in aerodynamic parameters for 5-stage steam turbine during warming and gradual start-up to nominal operating parameters .....	45
<b>T.Z. Kaczmarczyk, G. Żywica and E. Ihnatowicz:</b> Experimental investigation on a rotodynamic pump operating in the cogeneration system with a low-boiling working medium .....	63
<b>A. Szymański, S. Dykas, M. Majkut and M. Strozik:</b> The assessment of the calculation method for determining characteristics of one straight fin labyrinth seal .....	89
<b>D. Stępniaak, J. Surilo, P. Lampart and M. Szymaniak:</b> The analysis of energy and emission indicators of a piston engine supplied by a mixture of biogas .....	109
<b>L. Piechowski, R. Rządkowski, P. Troka, P. Piechowski and R. Szczepanik:</b> Rotor blade vibration simulator of steam turbine with aliasing frequencies up to 25 Hz .....	121
