

TRANSACTIONS OF THE INSTITUTE OF FLUID-FLOW MACHINERY
No. 135, 2017

C O N T E N T S

M.A. Gronowska-Szneler and J.M. Sawicki: Design criterion for hydrodynamic vortex separators	3
T. Kowalczyk, P. Ziółkowski, D. Sławiński, M. Cisak and J. Badur: A role of the heat and work uncompensated transformations in the balance of entropy and the turbomachinery efficiency temperature model	11
M. Waclawczyk: Beyond one-point turbulence closures	29
A. Gardzilewicz: Evaluating the efficiency of low pressure part of steam turbines based on probing measurements	41
J. Kaczyński and M. Kraft: Numerical investigation of particle separation in a centrifugal air separator	57
K. Tesch and K. Kaczorowska: Minimum drag shape bodies moving in inviscid fluid – revisited	73
M. Łuniewski and J. Pozorski: Spatial distribution and settling velocity of heavy particles in synthetic turbulent fields ..	87
P. Flaszynski and M. Piotrowicz: An investigation of hot spot location at turbine inlet – numerical simulations for factor project test rig	101
