Fostering waste plastics
valorisation supported by transition
in consumer behaviour for better
recycling and circular economy in
the South Baltic

- Duration July 2022 – October 2022
- 2 partners
- 40,000 Euro total budget
- To increase the waste plastics valorisation by: (1) to introduce new collection/ recycling techniques of waste plastics in the retail chains, (2) to develop the system of waste plastics logistics aiming at further manufacturing them into valuable products, (3) to develop the technologies and techniques for the valorisation, (4) to develop the system of waste plastics logistics aiming at final recirculation of plastic in manufactured products back to the retail chains, (5) to provide a long-term transition in consumer behaviour for better recycling and circular economy in the South Baltic.

The project is co-financed by the European Regional Development Fund
within the Interreg South Baltic Programme 2014 -2020
