

TRANSACTIONS OF THE INSTITUTE OF FLUID-FLOW MACHINERY
No. 128, 2015

C O N T E N T S

S. Polesek-Karczewska: Preface	3
Ł.J. Kapusta and A. Teodorczyk: Numerical study on in-cylinder blending by means of a simultaneous direct injection of two liquid fuels in a heavy duty compression ignition engine	5
M. Borcuch, M. Musiał and T.M. Wójcik: Thermal energy storage in ceresine-based accumulative heat exchanger	19
A. Roszko and E. Fornalik-Wajs: The heat transfer and flow structure analyses of low concentration copper nanofluids in a strong magnetic field	29
T. Bohdal, M. Sikora and K. Widomska: An investigation of the thermal characteristics of the refrigerants zeotropic mixtures condensation in minichannels	43
E. Strąk, R. Pastuszko and M. Piasecka: Study of heat transfer during pool boiling on minifins surface coated with carbon nanotubes	59
P. Ciżmiński, S. Polesek-Karczewska and D. Kardaś: Modeling of drying and pyrolysis in a gasifier during the startup phase	73
A. Majkowska, D. Sławiński and J. Badur: A robust model of material degradation within a corrosive environment	85
K. Strąk and M. Piasecka: A study of flow boiling heat transfer in a rectangular minichannel using liquid crystal and infrared thermography	97
S. Kornet and J. Badur: Enhanced evaporation of the condensate droplets within the asymmetrical shock wave zone	119

K. Ronewicz, Ł. Heda and D. Kardaś: Measurements of the dependence of wood's permeability to air on the temperature of the pyrolysis	131
J. Żabski: Implementation of the first period of convective drying in a commercially available CFD package	139
