*Institute of Fluid-Flow Machinery, PAFSci, ul Fiszera 14, 80-952 Gdańsk, Poland*

The bibliography collected by Ahmed K Noor, Bibliography of monographs and surveys on shells, Applied Mechanics Reviews 43(9) 223-234 (1990), ASME Book No AMR078, contains 411 books, 98 conference proceedings and 23 survey papers. In this report additional bibliography of monographs, books, conference proceedings, and survey papers on shells is collected, including a fairly complete additional list of books and survey papers by Polish authors and some early books by Love (1892-93), Rayleigh (1894), Cosserat (1909) and Timoshenko (1914-16), where shell theory is extensively covered.
